196 filings screened. 47 need attention, 44 are worth a look.

Concern	Level	Filings
Exceeds at a listed station	crit	42
Raised by a Finnish antenna	crit	0
ITU names Finland	crit	5
Near limit at a listed station	warn	27
Near frequency	warn	7
Exceeds, no listed station	warn	10
Cannot calculate	none	9
No applicable limit	none	17
Clear	none	79

Needs attention

1. **CSN-SSO** (124545403), China. Moving, orbit tilted 97.79°, up to 600 km up. Can be seen from Finland. Exceeds at a listed station: 42.76 dB over the limit (RR 21.16) at 90° above the horizon, at 3600–3700 MHz; on the frequencies of 4 listed stations (983254, 983816, 985407, 989011). At 3600–3700 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
2. **PAZ_2-A** (124520174), Spain. Moving, orbit tilted 97.4°, up to 514 km up. Can be seen from Finland. Exceeds at a listed station: 38.08 dB over the limit (RR 21.16) at 5.5° above the horizon, at 9900–10400 MHz; on the frequencies of 1 listed station (412266). At 9900–10400 MHz, Finland's frequency table (M4) lists Military use, Radars, (SRD) Equipment for detecting movement and for alert, Earth exploration satellite, …; licence-exempt: (SRD) Equipment for detecting movement and for alert. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
3. **PAZ_2-A** (324520174), Spain. Moving, orbit tilted 97.4°, up to 514 km up. Can be seen from Finland. Exceeds at a listed station: 38.08 dB over the limit (RR 21.16) at 5.5° above the horizon, at 9900–10400 MHz; on the frequencies of 1 listed station (412266). At 9900–10400 MHz, Finland's frequency table (M4) lists Military use, Radars, (SRD) Equipment for detecting movement and for alert, Earth exploration satellite, …; licence-exempt: (SRD) Equipment for detecting movement and for alert. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
4. **YG-1** (126545117), China. Moving, orbit tilted 98.5°, up to 800 km up. Can be seen from Finland. Exceeds at a listed station: 36.9 dB over the limit (RR 21.16) at 90° above the horizon, at 27450–27500 MHz; on the frequencies of 1 listed station (989200). At 27450–27500 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services, Fixed satellite; licence-exempt: Terrestrial systems capable of providing electronic communications services, Fixed satellite. Next:

Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

5. **AST-NG-C-4** (117520372), France. Moving, orbit tilted 101.4°, up to 1500 km up. Can be seen from Finland. Exceeds at a listed station: 35.47 dB over the limit (APP5 AN1 NOTE 2) at 90° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
6. **CHINASAT-H-60.5E** (124520183), China. Fixed in the sky over 60.5° E. Can be seen from Finland. Exceeds at a listed station: 28.64 dB over the limit (RR 5.389A) at 7.27° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
7. **CHINASAT-H-60.5E** (324520183), China. Fixed in the sky over 60.5° E. Can be seen from Finland. Exceeds at a listed station: 28.64 dB over the limit (RR 5.389A) at 7.27° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
8. **CHINASAT-G-33.5E** (124520184), China. Fixed in the sky over 33.5° E. Can be seen from Finland. Exceeds at a listed station: 26.72 dB over the limit (RR 5.389A) at 11.3° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). The ITU's records name Finland (provn). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
9. **CHINASAT-G-33.5E** (324520184), China. Fixed in the sky over 33.5° E. Can be seen from Finland. Exceeds at a listed station: 26.72 dB over the limit (RR 5.389A) at 11.3° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). The ITU's records name Finland (provn). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
10. **LUMIRX-1** (124520203), Korea (Republic of). Moving, orbit tilted 97.49°, up to 517.21 km up. Can be seen from Finland. Exceeds at a listed station: 24.85 dB over the limit (RR 21.16) at 5.5° above the horizon, at 9900–10400 MHz; on the frequencies of 1 listed station (412266). At 9900–10400 MHz, Finland's frequency table (M4) lists Military use, Radars, (SRD) Equipment for detecting movement and for alert, Earth exploration satellite, …; licence-exempt: (SRD) Equipment for detecting movement and for alert. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
11. **LUMIRX-1** (324520203), Korea (Republic of). Moving, orbit tilted 97.49°, up to 517.21 km up. Can be seen from Finland. Exceeds at a listed station: 24.85 dB over the limit (RR 21.16) at 5.5° above the horizon, at 9900–10400 MHz; on the frequencies of 1 listed station (412266). At 9900–10400 MHz, Finland's frequency table (M4) lists Military use, Radars, (SRD) Equipment for detecting movement and for alert, Earth exploration satellite, …; licence-exempt: (SRD) Equipment for detecting movement and for alert. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

12. **RGS-N** (125500066), Russian Federation. Moving, orbit tilted 63°, up to 40000 km up. Can be seen from Finland. Exceeds at a listed station: 21.43 dB over the limit (RR 21.16) at 90° above the horizon, at 7250–7375 MHz; 21.43 dB over the limit at 7250–7750 MHz, on the frequencies of 10 listed stations (600265, 603212, 607747, 609672, 621469, …). The ITU's records name Finland (provn). At 7250–7375 MHz, Finland's frequency table (M4) lists Fixed radiolinks. At 7250–7750 MHz, Finland's frequency table (M4) lists Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
13. **RLNEUTRON-1** (125545347), United States. Moving, orbit tilted 100°, up to 2500 km up. Can be seen from Finland. Exceeds at a listed station: 20.35 dB over the limit (RR 21.16) at 90° above the horizon, at 2200–2290 MHz; on the frequencies of 328 listed stations (408577, 440557, 452076, 454152, 467765, …). At 2200–2290 MHz, Finland's frequency table (M4) lists Mobile satellite, Military use, Space operation, Wireless cameras, …. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
14. **GRAVITAS** (125545368), United States. Moving, orbit tilted 98°, up to 7800 km up. Can be seen from Finland. Exceeds at a listed station: 14.92 dB over the limit (RR 21.16) at 90° above the horizon, at 2200–2290 MHz; on the frequencies of 328 listed stations (408577, 440557, 452076, 454152, 467765, …). At 2200–2290 MHz, Finland's frequency table (M4) lists Mobile satellite, Military use, Space operation, Wireless cameras, …. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
15. **COMPASS-80.3E** (119500051), China. Fixed in the sky over 80.3° E. Can be seen from Finland. Exceeds at a listed station: 11.94 dB over the limit (RR 5.402) at 9.01° above the horizon, at 2483.5–2500 MHz; 1.65 dB over the limit at 3700–4200 MHz, on the frequencies of 1 listed station (983816). At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At 3700–4200 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio, Radio altimeters, …; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
16. **COMPASS-80.3E** (319500051), China. Fixed in the sky over 80.3° E. Can be seen from Finland. Exceeds at a listed station: 11.94 dB over the limit (RR 5.402) at 9.01° above the horizon, at 2483.5–2500 MHz; 1.65 dB over the limit at 3700–4200 MHz, on the frequencies of 1 listed station (983816). At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At 3700–4200 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio, Radio altimeters, …; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
17. **INTELSAT7 66E** (95500027), United States. Fixed in the sky over 66° E. Can be seen from Finland. Exceeds at a listed station: 10.92 dB over the limit (RR 21.16) at 5.9° above the horizon, at 10975.5–11009.5 MHz;

0.82 dB over the limit at 3725.5–3759.5 MHz, on the frequencies of 1 listed station (983816). At 10975.5–11009.5 MHz, Finland's frequency table (M4) lists Fixed satellite. At 3725.5–3759.5 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

18. **INTELSAT7 66E** (322500245), United States. Fixed in the sky over 66° E. Can be seen from Finland. Exceeds at a listed station: 10.92 dB over the limit (RR 21.16) at 5.9° above the horizon, at 10975.5–11009.5 MHz; 0.82 dB over the limit at 3725.5–3759.5 MHz, on the frequencies of 1 listed station (983816). At 10975.5–11009.5 MHz, Finland's frequency table (M4) lists Fixed satellite. At 3725.5–3759.5 MHz, Finland's frequency table (M4) lists Terrestrial systems capable of providing electronic communications services; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

19. **USASAT-NGSO-3X** (123520029), United States. Moving, orbit tilted 148°, up to 614 km up. Can be seen from Finland. Exceeds at a listed station: 10.08 dB over the limit (RR 21.16) at 90° above the horizon, at 10700–11450 MHz; 3.98 dB over the limit at 17700–17950 MHz, on the frequencies of 16 listed stations (601452, 602266, 603413, 605729, 607797, …). At 10700–11450 MHz, Finland's frequency table (M4) lists Space research, Fixed satellite. At 17700–17950 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

20. **F-SAT-NG-15_B** (124520131), France. Moving, orbit tilted 89.4°, up to 1230 km up. Can be seen from Finland. Exceeds at a listed station: 9.86 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; 4.86 dB over the limit at 19300–19700 MHz, on the frequencies of 6 listed stations (600529, 602436, 611959, 616722, 624714, …). At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. At 19300–19700 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

21. **F-SAT-NG-15_B** (324520131), France. Moving, orbit tilted 89.4°, up to 1230 km up. Can be seen from Finland. Exceeds at a listed station: 9.86 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; 4.86 dB over the limit at 19300–19700 MHz, on the frequencies of 6 listed stations (600529, 602436, 611959, 616722, 624714, …). At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. At 19300–19700 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

22. **INSAT-COM(71E)** (124520214), India. Fixed in the sky over 71° E. Can be seen from Finland. Exceeds at a listed station: 8.75 dB over the limit (RR 21.16) at 4.99° above the horizon, at 10950–11200 MHz; 3.73 dB over the limit at 17700–17950 MHz, on the frequencies of 16 listed stations (601452, 602266, 603413, 605729, 607797, …). The ITU's records name Finland (provn, tr_aff_ntw). At 10950–11200 MHz, Finland's frequency table (M4) lists Fixed satellite. At 17700–17950 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

23. **SECOMSAT-5-78E** (124520194), Spain. Fixed in the sky over 78° E. Can be seen from Finland. Exceeds at a listed station: 7.05 dB over the limit (RR 21.16) at 4.99° above the horizon, at 7346–7375 MHz; 7.05 dB over the limit at 7375–7450 MHz, on the frequencies of 4 listed stations (603212, 627635, 632366, 642620). The ITU's records name Finland (provn). At 7346–7375 MHz, Finland's frequency table (M4) lists

Fixed radiolinks. At 7375–7450 MHz, Finland's frequency table (M4) lists Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

24. **SECOMSAT-5-78E** (324520194), Spain. Fixed in the sky over 78° E. Can be seen from Finland. Exceeds at a listed station: 7.05 dB over the limit (RR 21.16) at 4.99° above the horizon, at 7346–7375 MHz; 7.05 dB over the limit at 7375–7450 MHz, on the frequencies of 4 listed stations (603212, 627635, 632366, 642620). The ITU's records name Finland (provn). At 7346–7375 MHz, Finland's frequency table (M4) lists Fixed radiolinks. At 7375–7450 MHz, Finland's frequency table (M4) lists Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

25. **COMPASS-80E** (103500417), China. Fixed in the sky over 80° E. Can be seen from Finland. Exceeds at a listed station: 7.04 dB over the limit (RR 5.402) at 9.13° above the horizon, at 2483.5–2500 MHz; 3.25 dB over the limit at 3402–4198 MHz, on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …). At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At 3402–4198 MHz, Finland's frequency table (M4) lists Amateur, Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

26. **COMPASS-80E** (303500417), China. Fixed in the sky over 80° E. Can be seen from Finland. Exceeds at a listed station: 7.04 dB over the limit (RR 5.402) at 9.13° above the horizon, at 2483.5–2500 MHz; 3.25 dB over the limit at 3402–4198 MHz, on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …). At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At 3402–4198 MHz, Finland's frequency table (M4) lists Amateur, Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

27. **USASAT-30-3** (125545390), United States. Moving, orbit tilted 96.7°, up to 350 km up. Can be seen from Finland. Exceeds at a listed station: 6.63 dB over the limit (RR 21.16) at 90° above the horizon, at 25500–27000 MHz; on the frequencies of 4 listed stations (982288, 982907, 983454, 984084). At 25500–27000 MHz, Finland's frequency table (M4) lists (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services, Earth exploration satellite; licence-exempt: (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

28. **MULA** (125545392), Philippines. Moving, orbit tilted 97.9°, up to 600 km up. Can be seen from Finland. Exceeds at a listed station: 5.16 dB over the limit (RR 21.16) at 90° above the horizon, at 2222.728948–2223.271065 MHz; on the frequencies of 64 listed stations (800000, 800001, 800002, 800003, 800004, …).

At 2222.728948–2223.271065 MHz, Finland's frequency table (M4) lists Military use. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

29. **USASAT-NGSO-8E** (125520047), United States. Moving, orbit tilted 51.9°, up to 630 km up. Can be seen from Finland. Exceeds at a listed station: 4.49 dB over the limit (RR 21.16) at 90° above the horizon, at 17700–17800 MHz; on the frequencies of 6 listed stations (607797, 613999, 614038, 616738, 632251, …). At 17700–17800 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
30. **USASAT-NGSO-8F** (125520053), United States. Moving, orbit tilted 82°, up to 650 km up. Can be seen from Finland. Exceeds at a listed station: 4.34 dB over the limit (RR 21.16) at 90° above the horizon, at 17700–17800 MHz; on the frequencies of 6 listed stations (607797, 613999, 614038, 616738, 632251, …). At 17700–17800 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
31. **USASAT-NGSO-3X** (323520029), United States. Moving, orbit tilted 148°, up to 614 km up. Can be seen from Finland. Exceeds at a listed station: 3.98 dB over the limit (RR 21.16) at 90° above the horizon, at 17700–17950 MHz; on the frequencies of 16 listed stations (601452, 602266, 603413, 605729, 607797, …). At 17700–17950 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
32. **INSAT-COM(71E)** (324520214), India. Fixed in the sky over 71° E. Can be seen from Finland. Exceeds at a listed station: 3.73 dB over the limit (RR 21.16) at 4.99° above the horizon, at 18700–19700 MHz; on the frequencies of 24 listed stations (600529, 601452, 602266, 602436, 603413, …). The ITU's records name Finland (provn, tr_aff_ntw). At 18700–19700 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
33. **INSAT-KA68ER** (125500068), India. Fixed in the sky over 68° E. Can be seen from Finland. Exceeds at a listed station: 3.55 dB over the limit (RR 21.16) at 5.36° above the horizon, at 17700–17950 MHz; on the frequencies of 16 listed stations (601452, 602266, 603413, 605729, 607797, …). At 17700–17950 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
34. **SNAPPY** (126545098), United States. Moving, orbit tilted 97.4°, up to 500 km up. Can be seen from Finland. Exceeds at a listed station: 3.25 dB over the limit (RR 21.16) at 90° above the horizon, at 2229.27984–2229.72016 MHz; on the frequencies of 85 listed stations (800007, 800008, 800009, 800010, 800011, …). At 2229.27984–2229.72016 MHz, Finland's frequency table (M4) lists Military use. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.
35. **GW-S** (125500277), China. Moving, orbit tilted 86.5°, up to 1175 km up. Can be seen from Finland. Exceeds at a listed station: 2.56 dB over the limit (RR 21.16) at 5° above the horizon, at 39500–40000 MHz; 0.71 dB over the limit at 3400–4200 MHz, on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …). At 39500–40000 MHz, Finland's frequency table (M4) lists Fixed satellite, Mobile radio, Mobile satellite. At 3400–4200 MHz, Finland's frequency table (M4) lists Military use, Radars, Amateur, Terrestrial systems capable of providing electronic communications services, …; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Check the

filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

36. **PYXIS** (126500052), Japan. Moving, orbit tilted 97.6°, up to 600 km up. Can be seen from Finland. Exceeds at a listed station: 2.09 dB over the limit (RR 21.16) at 90° above the horizon, at 8025–8325 MHz; on the frequencies of 1 listed station (405674). At 8025–8325 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Earth exploration satellite. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

37. **ION SCV-025** (126545131), Italy. Moving, orbit tilted 97.44°, up to 510 km up. Can be seen from Finland. Exceeds at a listed station: 2.08 dB over the limit (RR 21.16) at 90° above the horizon, at 2243.192–2243.809 MHz; on the frequencies of 43 listed stations (800026, 800027, 800028, 800029, 800056, …). At 2243.192–2243.809 MHz, Finland's frequency table (M4) lists Military use. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

38. **ION SCV-026** (126545132), Italy. Moving, orbit tilted 97.44°, up to 510 km up. Can be seen from Finland. Exceeds at a listed station: 2.08 dB over the limit (RR 21.16) at 90° above the horizon, at 2277.192–2277.809 MHz; on the frequencies of 4 listed stations (440557, 452076, 467765, 477781). At 2277.192–2277.809 MHz, Finland's frequency table (M4) lists Space operation, Wireless cameras. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

39. **LOXSAT** (125545384), United States. Moving, orbit tilted 40°, up to 450 km up. Can be seen from Finland. Exceeds at a listed station: 1.16 dB over the limit (RR 21.16) at 90° above the horizon, at 2217.5–2222.5 MHz; on the frequencies of 54 listed stations (800000, 800001, 800002, 800003, 800004, …). At 2217.5–2222.5 MHz, Finland's frequency table (M4) lists Military use. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

40. **AE4LA** (126545060), Japan. Moving, orbit tilted 97.8°, up to 600 km up. Can be seen from Finland. Exceeds at a listed station: 0.95 dB over the limit (RR 21.16) at 90° above the horizon, at 2277–2277.6 MHz; on the frequencies of 2 listed stations (452076, 467765). At 2277–2277.6 MHz, Finland's frequency table (M4) lists Space operation, Wireless cameras. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

41. **SOLAR SENTRY** (126545119), Germany. Moving, orbit tilted 97.7°, up to 590 km up. Can be seen from Finland. Exceeds at a listed station: 0.28 dB over the limit (RR 21.16) at 90° above the horizon, at 2244–2246 MHz; on the frequencies of 32 listed stations (800027, 800028, 800029, 800057, 800058, …). The ITU's records name Finland (srv_area). At 2244–2246 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

42. **NSL-1** (117520318), Israel. Moving, orbit tilted 98°, up to 810 km up. Can be seen from Finland. Exceeds at a listed station: 0.19 dB over the limit (RR 21.16) at 90° above the horizon, at 18800–19300 MHz; on the frequencies of 14 listed stations (600529, 601452, 602266, 603413, 605729, …). At 18800–19300 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Check the filing's power and beams against the listed stations, and decide within the comment period whether to comment to the filing administration.

43. **STARERA-3** (125520111), China. Moving, orbit tilted 97.6°, up to 525 km up. Can be seen from Finland. ITU names Finland: 28.62 dB over the limit (APP5 AN1 NOTE 2) at 90° above the horizon, at 1525–1530 MHz; no listed station on its frequencies. The ITU's records name Finland (provn). At 1525–1530 MHz,

Finland's frequency table (M4) lists Mobile satellite. Next: Read what the ITU records for Finland in this filing, and decide whether Finland needs to respond.

44. **HISPASAT-5-52.5W** (124520179), Spain. Fixed in the sky over 52.5° W. Can be seen from Finland. ITU names Finland: 16.62 dB over the limit (RR 21.16) at 0.31° above the horizon, at 42000–42500 MHz; no listed station on its frequencies. The ITU's records name Finland (provn). At 42000–42500 MHz, Finland's frequency table (M4) lists Broadcasting, Broadcasting satellite, Fixed radiolinks, Fixed satellite, …. Next: Read what the ITU records for Finland in this filing, and decide whether Finland needs to respond.
45. **HISPASAT-5-52.5W** (324520179), Spain. Fixed in the sky over 52.5° W. Can be seen from Finland. ITU names Finland: 16.62 dB over the limit (RR 21.16) at 0.31° above the horizon, at 42000–42500 MHz; no listed station on its frequencies. The ITU's records name Finland (provn). At 42000–42500 MHz, Finland's frequency table (M4) lists Broadcasting, Broadcasting satellite, Fixed radiolinks, Fixed satellite, …. Next: Read what the ITU records for Finland in this filing, and decide whether Finland needs to respond.
46. **QATARGOV-G1-25.5E** (124520173), Qatar. Fixed in the sky over 25.5° E. Can be seen from Finland. ITU names Finland: 5.53 dB under the limit (RR 21.16) at 11.39° above the horizon; no listed station on its frequencies. The ITU's records name Finland (provn). Next: Read what the ITU records for Finland in this filing, and decide whether Finland needs to respond.
47. **QATARGOV-G1-25.5E** (324520173), Qatar. Fixed in the sky over 25.5° E. Can be seen from Finland. ITU names Finland: No calculated margin; no listed station on its frequencies. The ITU's records name Finland (provn). Next: Read what the ITU records for Finland in this filing, and decide whether Finland needs to respond.

Worth a look

1. **TIANQI-3E-2** (124545392), China. Moving, orbit tilted 45°, up to 900 km up. Can be seen from Finland. Near limit at a listed station: 22.48 dB over the limit (RR 21.16) at 5° above the horizon, at 32300–32380 MHz; 2.46 dB under the limit at 2200–2290 MHz, on the frequencies of 328 listed stations (408577, 440557, 452076, 454152, 467765, …); no listed station is on a transmission over the limit. At 32300–32380 MHz, Finland's frequency table (M4) lists Radionavigation, Fixed radiolinks. At 2200–2290 MHz, Finland's frequency table (M4) lists Mobile satellite, Military use, Space operation, Wireless cameras, …. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
2. **KAZSAT-KA-67.2E-2** (124520204), Kazakhstan. Fixed in the sky over 67.2° E. Can be seen from Finland. Near limit at a listed station: 15.97 dB over the limit (RR 21.16) at 5.58° above the horizon, at 37500–38000 MHz; 0.35 dB under the limit at 17700–18000 MHz, on the frequencies of 16 listed stations (601452, 602266, 603413, 605729, 607797, …); no listed station is on a transmission over the limit. At 37500–38000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite. At 17700–18000 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
3. **COMPASS-58.75E** (103500416), China. Fixed in the sky over 58.75° E. Can be seen from Finland. Near limit at a listed station: 5.65 dB over the limit (RR 5.402) at 7.68° above the horizon, at 2483.5–2500 MHz; 2.03 dB under the limit at 3402–4198 MHz, on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …); no listed station is on a transmission over the limit. At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At

3402–4198 MHz, Finland's frequency table (M4) lists Amateur, Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

4. **COMPASS-58.75E** (303500416), China. Fixed in the sky over 58.75° E. Can be seen from Finland. Near limit at a listed station: 5.65 dB over the limit (RR 5.402) at 7.68° above the horizon, at 2483.5–2500 MHz; 2.03 dB under the limit at 3402–4198 MHz, on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …); no listed station is on a transmission over the limit. At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. At 3402–4198 MHz, Finland's frequency table (M4) lists Amateur, Terrestrial systems capable of providing electronic communications services, Fixed satellite, Mobile radio; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
5. **CDCSAT-1** (126500093), United Kingdom. Moving, orbit tilted 97.74°, up to 650 km up. Can be seen from Finland. Near limit at a listed station: 0.05 dB under the limit (RR 21.16) at 90° above the horizon, at 2201–2241 MHz; on the frequencies of 320 listed stations (800000, 800001, 800002, 800003, 800004, …). At 2201–2241 MHz, Finland's frequency table (M4) lists Military use. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
6. **AMZLFG** (126545087), United States. Moving, orbit tilted 60°, up to 595 km up. Can be seen from Finland. Near limit at a listed station: 0.06 dB under the limit (RR 21.16) at 90° above the horizon, at 2244–2246 MHz; on the frequencies of 32 listed stations (800027, 800028, 800029, 800057, 800058, …). At 2244–2246 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
7. **CONNECTA IOT** (126500107), Türkiye. Moving, orbit tilted 97.6°, up to 550 km up. Can be seen from Finland. Near limit at a listed station: 0.08 dB under the limit (RR 21.16) at 90° above the horizon, at 2237–2243 MHz; on the frequencies of 128 listed stations (800018, 800019, 800020, 800021, 800022, …). At 2237–2243 MHz, Finland's frequency table (M4) lists Military use. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
8. **NEONSAT** (123500005), Korea (Republic of). Moving, orbit tilted 97.4°, up to 501 km up. Can be seen from Finland. Near limit at a listed station: 0.27 dB under the limit (RR 21.16) at 90° above the horizon, at 8050–8350 MHz; on the frequencies of 1 listed station (405674). At 8050–8350 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Earth exploration satellite. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
9. **NEONSAT** (326500047), Korea (Republic of). Moving, orbit tilted 97.4°, up to 501 km up. Can be seen from Finland. Near limit at a listed station: 0.27 dB under the limit (RR 21.16) at 90° above the horizon, at 8050–8350 MHz; on the frequencies of 1 listed station (405674). At 8050–8350 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Earth exploration satellite. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
10. **KAZSAT-KA-67.2E-2** (324520204), Kazakhstan. Fixed in the sky over 67.2° E. Can be seen from Finland. Near limit at a listed station: 0.35 dB under the limit (RR 21.16) at 5.58° above the horizon, at 18800–19700 MHz; on the frequencies of 18 listed stations (600529, 601452, 602266, 602436, 603413, …). At

18800–19700 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

11. **JDG-SY** (125545402), China. Moving, orbit tilted 150°, up to 535 km up. Can be seen from Finland. Near limit at a listed station: 0.78 dB under the limit (RR 21.16) at 90° above the horizon, at 8025–8400 MHz; on the frequencies of 1 listed station (405674). At 8025–8400 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Earth exploration satellite. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
12. **KOREASAT-T1** (126500096), Korea (Republic of). Moving, orbit tilted 44°, up to 520 km up. Can be seen from Finland. Near limit at a listed station: 0.79 dB under the limit (RR 21.16) at 90° above the horizon, at 2215.046–2228.78 MHz; on the frequencies of 139 listed stations (800000, 800001, 800002, 800003, 800004, …). At 2215.046–2228.78 MHz, Finland's frequency table (M4) lists Military use. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
13. **ION SCV-024** (125545399), Italy. Moving, orbit tilted 97.75°, up to 590 km up. Can be seen from Finland. Near limit at a listed station: 0.82 dB under the limit (RR 21.16) at 90° above the horizon, at 2244.895–2246.105 MHz; on the frequencies of 11 listed stations (800029, 800059, 800089, 800119, 800149, …). At 2244.895–2246.105 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
14. **MTG-EUM_3.5E** (124520192), Germany. Fixed in the sky over 3.5° E. Can be seen from Finland. Near limit at a listed station: 0.93 dB under the limit (RR 21.16) at 9.52° above the horizon, at 26520–27000 MHz; on the frequencies of 1 listed station (984084). At 26520–27000 MHz, Finland's frequency table (M4) lists (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services, Earth exploration satellite; licence-exempt: (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
15. **GARAI-B** (125545354), Sweden. Moving, orbit tilted 97.5°, up to 500 km up. Can be seen from Finland. Near limit at a listed station: 0.95 dB under the limit (RR 21.16) at 90° above the horizon, at 2240–2246 MHz; on the frequencies of 86 listed stations (800022, 800023, 800024, 800025, 800026, …). At 2240–2246 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
16. **KRAKEN SATELLITE** (126545034), United States. Moving, orbit tilted 51.6°, up to 365 km up. Can be seen from Finland. Near limit at a listed station: 1.01 dB under the limit (RR 21.16) at 90° above the horizon, at 2221.13–2223.87 MHz; on the frequencies of 75 listed stations (800000, 800001, 800002, 800003, 800004, …). At 2221.13–2223.87 MHz, Finland's frequency table (M4) lists Military use. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
17. **ZIYUAN-3-03** (126500087), China. Moving, orbit tilted 97°, up to 505 km up. Can be seen from Finland. Near limit at a listed station: 1.04 dB under the limit (RR 21.16) at 90° above the horizon, at 2245–2247 MHz; on the frequencies of 11 listed stations (800029, 800059, 800089, 800119, 800149, …). At 2245–2247 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
18. **MCSAT LEO** (325500168), France. Moving, orbit tilted 87.9°, up to 1200 km up. Can be seen from Finland. Near limit at a listed station: 1.18 dB under the limit (RR 21.16) at 90° above the horizon, at 17800–18580 MHz; on the frequencies of 18 listed stations (600529, 601452, 602266, 602436, 603413, …). At 17800–18580 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

19. **XH-1** (125545298), China. Moving, orbit tilted 97.56°, up to 540 km up. Can be seen from Finland. Near limit at a listed station: 1.22 dB under the limit (RR 21.16) at 90° above the horizon, at 8025–8400 MHz; on the frequencies of 1 listed station (405674). At 8025–8400 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Earth exploration satellite. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

20. **MTG-EUM_9.5E** (124520193), Germany. Fixed in the sky over 9.5° E. Can be seen from Finland. Near limit at a listed station: 1.31 dB under the limit (RR 21.16) at 10.32° above the horizon, at 26520–27000 MHz; on the frequencies of 1 listed station (984084). At 26520–27000 MHz, Finland's frequency table (M4) lists (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services, Earth exploration satellite; licence-exempt: (SRD) Automotive Short Range Radar (SRR), Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

21. **AST-NG-C-4** (317520372), France. Moving, orbit tilted 101.4°, up to 1500 km up. Can be seen from Finland. Near limit at a listed station: 2.05 dB under the limit (APP5 AN1 NOTE 2) at 90° above the horizon, at 2170–2200 MHz; on the frequencies of 1 listed station (989650). At 2170–2200 MHz, Finland's frequency table (M4) lists Digital mobile network, Mobile satellite, Military use; licence-exempt: Digital mobile network. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

22. **KOREASAT-T3** (126500098), Korea (Republic of). Moving, orbit tilted 44°, up to 520 km up. Can be seen from Finland. Near limit at a listed station: 2.09 dB under the limit (RR 21.16) at 90° above the horizon, at 2215.046–2228.78 MHz; on the frequencies of 139 listed stations (800000, 800001, 800002, 800003, 800004, …). At 2215.046–2228.78 MHz, Finland's frequency table (M4) lists Military use. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

23. **RGS-S-45E** (125512022), Russian Federation. Fixed in the sky over 45° E. Can be seen from Finland. Near limit at a listed station: 2.5 dB under the limit (RR 21.16) at 10.35° above the horizon, at 3400–3950 MHz; on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …). At 3400–3950 MHz, Finland's frequency table (M4) lists Military use, Radars, Amateur, Terrestrial systems capable of providing electronic communications services, …; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

24. **USASAT-NGSO-9C** (126500053), United States. Moving, orbit tilted 51.9°, up to 630 km up. Can be seen from Finland. Near limit at a listed station: 2.51 dB under the limit (RR 21.16) at 90° above the horizon, at 19300–19400 MHz; on the frequencies of 2 listed stations (600529, 616722). At 19300–19400 MHz, Finland's frequency table (M4) lists Fixed satellite, Fixed radiolinks. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

25. **TYVAK-0404** (125545400), Italy. Moving, orbit tilted 97.6°, up to 600 km up. Can be seen from Finland. Near limit at a listed station: 2.54 dB under the limit (RR 21.16) at 90° above the horizon, at 2243–2247 MHz; on the frequencies of 43 listed stations (800026, 800027, 800028, 800029, 800056, …). At 2243–2247 MHz, Finland's frequency table (M4) lists Military use, Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

26. **CLOUDCT** (124545327), Germany. Moving, orbit tilted 97.4°, up to 550 km up. Can be seen from Finland. Near limit at a listed station: 2.88 dB under the limit (RR 21.16) at 90° above the horizon, at 2274.5–2276.5 MHz; on the frequencies of 3 listed stations (452076, 454152, 467765). At 2274.5–2276.5 MHz, Finland's frequency table (M4) lists Space operation, Wireless cameras. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.

27. **RGS-S-35E** (125512023), Russian Federation. Fixed in the sky over 35° E. Can be seen from Finland. Near limit at a listed station: 2.93 dB under the limit (RR 21.16) at 11.24° above the horizon, at 3400–3950 MHz; on the frequencies of 7 listed stations (981340, 983254, 983816, 985407, 986805, …). At 3400–3950 MHz, Finland's frequency table (M4) lists Military use, Radars, Amateur, Terrestrial systems capable of providing electronic communications services, …; licence-exempt: Terrestrial systems capable of providing electronic communications services. Next: Look at the margin and the listed stations, and decide whether to watch the filing or comment.
28. **K-RADCUBE** (125545046), Korea (Republic of). Moving, orbit tilted 39°, up to 70606 km up. Can be seen from Finland. Near frequency: 14.51 dB over the limit (RR 21.16) at 90° above the horizon, at 2249.85–2250.15 MHz; 11 listed stations near its frequencies. At 2249.85–2250.15 MHz, Finland's frequency table (M4) lists Space operation, Wireless cameras. Next: Check whether the Finnish use next to these frequencies could be affected.
29. **NUSANTARA-NGSO-PS1** (124520221), Indonesia. Moving, orbit tilted 97.6°, up to 550 km up. Can be seen from Finland. Near frequency: 10.56 dB over the limit (APP5 AN1 1.1) at 90° above the horizon, at 137–137.03 MHz; 1 listed station near its frequencies. At 137–137.03 MHz, Finland's frequency table (M4) lists Meteorological-satellites, Mobile satellite, Space operation. Next: Check whether the Finnish use next to these frequencies could be affected.
30. **NUSANTARA-NGSO-PS1** (324520221), Indonesia. Moving, orbit tilted 97.6°, up to 550 km up. Can be seen from Finland. Near frequency: 10.56 dB over the limit (APP5 AN1 1.1) at 90° above the horizon, at 137–137.03 MHz; 1 listed station near its frequencies. At 137–137.03 MHz, Finland's frequency table (M4) lists Meteorological-satellites, Mobile satellite, Space operation. Next: Check whether the Finnish use next to these frequencies could be affected.
31. **ZIYUAN-3-04** (126500075), China. Moving, orbit tilted 97.42°, up to 500 km up. Can be seen from Finland. Near frequency: 0.95 dB under the limit (RR 21.16) at 90° above the horizon, at 2215–2216 MHz; 32 listed stations near its frequencies. At 2215–2216 MHz, Finland's frequency table (M4) lists Military use. Next: Check whether the Finnish use next to these frequencies could be affected.
32. **CHINASAT-31** (309500876), China. Fixed in the sky over 80° E. Can be seen from Finland. Near frequency: 1.06 dB under the limit (RR 5.402) at 9.13° above the horizon, at 2483.5–2500 MHz; 1 listed station near its frequencies. At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. Next: Check whether the Finnish use next to these frequencies could be affected.
33. **CHINASAT-31** (109500876), China. Fixed in the sky over 80° E. Can be seen from Finland. Near frequency: 1.17 dB under the limit (RR 5.402) at 5° above the horizon, at 2483.5–2500 MHz; 1 listed station near its frequencies. At 2483.5–2500 MHz, Finland's frequency table (M4) lists (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …; licence-exempt: (SRD) Equipment for automatic vehicle identification for railways (AVI), (SRD) Equipment for detecting movement and for alert, (SRD) Non-specific Short Range Devices, (SRD) Wideband data transmission systems (WAS/RLAN), …. Next: Check whether the Finnish use next to these frequencies could be affected.
34. **K-COMSAT** (126545127), Korea (Republic of). Moving, orbit tilted 44°, up to 1230 km up. Can be seen from Finland. Near frequency: 1.67 dB under the limit (RR 21.16) at 90° above the horizon, at 2268.048–

2269.072 MHz; 3 listed stations near its frequencies. At 2268.048–2269.072 MHz, Finland's frequency table (M4) lists Space operation, Wireless cameras. Next: Check whether the Finnish use next to these frequencies could be affected.

35. **USASAT-NGSO-12** (123520028), United States. Moving, orbit tilted 97.5°, up to 1080 km up. Can be seen from Finland. Exceeds, no listed station: 24.53 dB over the limit (RES609/REC608) at 90° above the horizon, at 1180.4–1200.4 MHz; no listed station on its frequencies. At 1180.4–1200.4 MHz, Finland's frequency table (M4) lists Distance measuring equipment (DME), Radionavigation satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
36. **USASAT-NGSO-12** (126500063), United States. Moving, orbit tilted 97.5°, up to 1080 km up. Can be seen from Finland. Exceeds, no listed station: 24.53 dB over the limit (RES609/REC608) at 90° above the horizon, at 1180.4–1200.4 MHz; no listed station on its frequencies. At 1180.4–1200.4 MHz, Finland's frequency table (M4) lists Distance measuring equipment (DME), Radionavigation satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
37. **USASAT-NGSO-12** (323520028), United States. Moving, orbit tilted 97.5°, up to 1080 km up. Can be seen from Finland. Exceeds, no listed station: 18.13 dB over the limit (RES609/REC608) at 90° above the horizon, at 1180.4–1200.4 MHz; no listed station on its frequencies. At 1180.4–1200.4 MHz, Finland's frequency table (M4) lists Distance measuring equipment (DME), Radionavigation satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
38. **HTV-X-GN** (126500026), Japan. Moving, orbit tilted 51.6°, up to 500 km up. Can be seen from Finland. Exceeds, no listed station: 10.41 dB over the limit (RR 21.16) at 90° above the horizon, at 2210.747–2213.253 MHz; no listed station on its frequencies. At 2210.747–2213.253 MHz, Finland's frequency table (M4) lists Military use. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
39. **SAILSPACE-2-A-1** (124520191), China. Moving, orbit tilted 80.4°, up to 900 km up. Can be seen from Finland. Exceeds, no listed station: 7.48 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; no listed station on its frequencies. At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
40. **SAILSPACE-2-A-1** (324520191), China. Moving, orbit tilted 80.4°, up to 900 km up. Can be seen from Finland. Exceeds, no listed station: 7.48 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; no listed station on its frequencies. At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
41. **USASAT-NGSO-3Y-1** (124520220), United States. Moving, orbit tilted 148°, up to 614 km up. Can be seen from Finland. Exceeds, no listed station: 6.38 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; no listed station on its frequencies. At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.

42. **USASAT-NGSO-3Y-1** (324520220), United States. Moving, orbit tilted 148°, up to 614 km up. Can be seen from Finland. Exceeds, no listed station: 6.38 dB over the limit (RR 21.16) at 5° above the horizon, at 37500–40000 MHz; no listed station on its frequencies. At 37500–40000 MHz, Finland's frequency table (M4) lists Fixed radiolinks, Fixed satellite, Mobile radio, Mobile satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
43. **KPS-NGSO-A** (124520188), Korea (Republic of). Moving, orbit tilted 42°, up to 38948.35 km up. Can be seen from Finland. Exceeds, no listed station: 2.44 dB over the limit (RES609/REC608) at 90° above the horizon, at 1164.45–1188.45 MHz; no listed station on its frequencies. At 1164.45–1188.45 MHz, Finland's frequency table (M4) lists Distance measuring equipment (DME), Radionavigation satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
44. **KPS-NGSO-A** (324520188), Korea (Republic of). Moving, orbit tilted 42°, up to 38948.35 km up. Can be seen from Finland. Exceeds, no listed station: 2.44 dB over the limit (RES609/REC608) at 90° above the horizon, at 1164.45–1188.45 MHz; no listed station on its frequencies. At 1164.45–1188.45 MHz, Finland's frequency table (M4) lists Distance measuring equipment (DME), Radionavigation satellite. Next: Check the Finnish uses the frequency table (M4) lists on these frequencies, licence-exempt ones first: an exceedance counts even with no listed station.
